

Press Release

February 2010

Exclusive launch of Elemis's new Modern Skin Facial at Ragdale Hall

At last a specific facial that tackles the problems that modern living throws at our skin. Lifestyle stresses, pollution, air-conditioning and a 'fast' diet, can play havoc with our complexion even at a relatively young age.

Elemis are exclusively launching this new facial at award winning spa Ragdale Hall on 15th February and throughout the country from April.

Designed by Elemis' innovative Director of Treatment Development, Noella Gabriel, she says "I specially designed this facial to deal with today's modern skin. I am constantly seeing young women with skincare concerns that manifest from our modern everyday lifestyles.

The facial involves a layering of active products to raise mineral levels, regenerate skin cells, rebalance sebum levels and boost radiance".

Bursting with antioxidant rich minerals and vitamins, this purifying treatment also helps to remove damaging toxins resulting in a clearer, radiant and more balance skin.

One hour £60
