Spa Blue Changing Room Refurbishment

Work has now commenced to complete the refurbishment of the Blue Changing Room.

We are very excited to announce that this project will upgrade facilities to include an additional toilet and 2 extra showers.

The first phase of the project will be to create a new vanity area, with 3 new toilet cubicles.

Once the new vanity area is open, work will commence to refurbish the shower area and this will include the provision of an additional 2 showers to replace the existing toilets.

We will then complete the redecoration and flooring to the main locker part of the room.

Finally, work will take place to upgrade the existing disabled changing facilities. During this period, alternative temporary facilities will be made available.

This project will be completed in stages and every effort will be made to minimise inconvenience to guests throughout the project, although at times there will be some noise and disruption and we ask for your cooperation as we work to improve and extend your facilities.
